

WeatherQB

Sports weather from a meteorologist · weatherqb.com

WHAT IT IS

WeatherQB forecasts the game, not just the day: the wind, rain, cold and heat at kickoff, first pitch and tee time, for every NFL, college football, MLB and golf event. Forecasts are graded against the weather that was actually observed.

WHAT IT COVERS

- **Game forecasts:** every NFL, college football and MLB game, plus PGA Tour and DP World Tour events, hour by hour through the game
- **Weather Hazards:** severe weather, heavy rain and winter storm maps, with game travel ranked worst trip first
- **Tropics:** active storms and what they mean for games in their path
- **Degree by Degree:** city forecasts with how confident the forecast is
- **Weather history:** how wind, rain and cold have moved NFL, college and MLB games, and how each NFL player does in the weather
- **Fantasy weather:** which games have enough wind or rain to move fantasy points each NFL week
- **The Weather Playbook:** a twice-weekly look ahead, Tuesdays and Fridays

WHO IS BEHIND IT

Mike Musher, meteorologist, 30+ years at NOAA, the National Weather Service, the Weather Prediction Center and The Weather Channel.

As seen and heard on: FOX4 Kansas City · The News Junkie, Real Radio 104.1 WTKS, Orlando · Sharp Football Analysis (weekly NFL weather analysis).

WORK WITH US

Interviews (same-day quotes), advertising and sponsorships, data partnerships and speaking.
